**KITCHEN**  
cabinets  
near me

# ABOUT US

Cabinet Refacing & More was established in 2014 in order to fill a void in the market between low cost and quality cabinet painting and high-cost cabinet replacement. With our refacing service, we offer clients convenience and cost-savings when upgrading their kitchen. We've established relationships with several high-end cabinet companies and interior designers in Southeast Michigan doing both cabinet installs and refacing projects.

Owned by a father and son-in-law team, we know the value of personalized customer service and using high-quality products. We treat every home like it's our own and only use the best materials in the industry.

## **Visit store Cabinet Prefacing & More | A reputable cabinet prefacing firm**

Cabinet Prefacing & More is one of the modern and reputable cabinet prefacing companies to obtain quality standard reface kitchen cabinets near me, Michigan. We provide a one-of-a-kind solution for improving the appearance of your kitchen. A variety of cabinet doors and veneers are available, from traditional to transitional, to give the kitchen a unique look. You will receive a hassle-free kitchen transformation model at a lower cost. Book your desired item today by contacting our team.

Looking to upgrade your kitchen? Changing the color, wood type, and/or door style can do a lot to improve the look of your kitchen. Cabinet refacing can help save your time, money and a lot of hassle and give your amazing looking cabinets!

## **What is cabinet refacing?**

Cabinet refacing is 3-5 days process to easily upgrade your cabinets. Doors and drawer fronts are removed, and the outside of your cabinet boxes are “reskinned” using a high quality, durable veneer. New doors and drawer fronts are installed with either new or reused hardware. Learn more about our cabinet refacing process [HERE](#).

The prefinished veneer sheet stock is trimmed to a precise width. Your Cabinet Refacing & More installer has the tools and training to do this critical job right. The new veneer is carefully aligned, applied, then smoothed for lasting adhesion.

Veneered edges are trimmed flush with the cabinet components and sanded as needed. Often these edges are covered with a special molding.
