Enzyme Facial Near Me

ABOUT US

Advanced Esthetics LVC provides premiere aesthetics expertise with seasoned, laser technology. We employ people who are passionate about helping people gain confidence and meet their skincare goals. All our estheticians are certified and work to give all our patients the best service and care possible and are happy to answer any questions you have.

Experience the DMK difference with a tailored treatment program for your skin. These products are natural, botanical-based, and pharmaceutical grade – built on a result-orientated approach to skincare. Using the principles of biochemistry, DMK has formulated a range of treatments and products that reeducate your skin on a cellular level. By matching the products with your body's chemistry, the skin is induced to respond in a positive manner; this is why we believe that one-size can't fit all and work with each client to give them an individualized plan.

DMK

Danné Montague-King®

The DMK concept is simply about restoring balancing and enhancing skin to function optimally through 4 stages:

- **Remove the dead skin cell build-up, which leads to the appearance of dry skin, fine lines and skin discoloration.**
- **Rebuild the living cells by providing proteins, amino acids, and nutrients. This enables the cells to stay alive longer and to perform optimally for healthier, younger looking skin.**
- **Protect the skin from the sun, free radicals, glycation, and other environmental factors that lead to premature aging.**
- **Maintain: Provide and regulate skin function to MAINTAIN the results achieved by the DMK professional treatments, with the appropriate DMK Home Prescriptives.**

How DMK Works

DMK is the sole company to use transfer messenger enzymes in the signature DMK Enzyme Therapy, which is used as the base of all DMK treatments to oxygenate, strengthen, nourish, and tone the skin. To encourage the skin to perform like younger, healthier skin DMK's signature Enzyme Therapy works alongside DMK skin protocols and Home Prescriptive programs to achieve long-term results.

This treatment system can be used to correct skin conditions such as acne, aged skin, pigmentation, scarring, and reactive skin, helping people to feel better about their skin.
